Become an Approved MAT Trainer

The Medication Administration Training (MAT) - Training of Trainers (TOT) is a three-day course designed to prepare licensed healthcare providers to effectively teach the child care provider medication administration course. The TOT covers the entire MAT provider curriculum in detail and focuses on objectively observing participant skills and competency. Prospective trainers will be expected to pass a written test, and successfully demonstrate observation of skills demonstration and a teach-back component. Training of Trainers is offered at no charge and successful participants will be provided with training materials and approved trainer certification.

If you are a Registered Professional Nurse, Nurse Practitioner, Physician or Physician Assistant, currently licensed in New York State, and you have a working knowledge of Child Day Care regulations in NY, you may qualify.
